OVERVIEW

This educational symposium is designed for the orthopaedic fellow who will soon be entering the practice setting. Setting up or joining a practice brings challenges to the junior partner. Experts who have been in various settings will present tips on starting a practice, working in an academic setting, building efficiency into a practice, avoiding malpractice situations, working with industry and being a successful junior partner. Content will also focus on the latest surgical approaches to primary and revision hip and knee surgery. Fellows will present cases for review and discussion with their colleagues and the experts. Video vignettes and round table discussions will provide insight into failures and successes related to surgical management of the total joint patient. This symposium is designed to be highly interactive and faculty will be accessible for consultation and discussion.

OBJECTIVES

Upon completion of this symposium, the fellow should be able to:

1. Differentiate practice settings and management philosophies which can be applied to a total joint practice.
2. Evaluate surgical choices for hip and knee reconstruction based on patient characteristics and pathology.
3. Analyze patient cases to assess surgical choices, outcomes and alternative strategies.
4. Describe current guidelines for preventing infection and thrombosis, managing pain and blood product use.
5. Discuss assessment and integration of advanced technologies to improve patient outcomes.
6. Address contemporary challenges in orthopaedic practice and steps to manage or overcome.

LEVELS OF SUPPORT

IOEN will be the educational provider for the 18th Annual Joint Replacement Fellows Symposium. This meeting will be held **January 29-31, 2027** at the Grand Hyatt Hotel, Vail, Colorado.

The course director for this symposium is Richard A. Berger, MD, Assistant Professor Joint Reconstruction at Rush University Medical Center in Chicago. Dr. Berger has prepared an exceptional agenda with speakers who are experts in their field. The program is for joint fellows who are entering the practice setting. Presentation topics will include tips on starting your own practice, working in private and academic settings, building efficiency into their practice, and how to be a successful junior partner. Content will focus on the latest surgical approaches to primary and revision hip and knee surgery. The fellows will prepare and present challenging clinical cases for group discussion with course faculty consulting and providing guidance. This will be a highly interactive conference with opportunity for robust discussion and case presentations.

We believe that inviting multiple companies to exhibit and provide support for various activities will increase the value to the attendees. The attendees have requested that commercial companies be present to provide direction and education on advancements in this field of practice to improve patient care and clinical outcomes.

We are anticipating 50 fellows who are in their final years of fellowship to be in attendance at this symposium. The course director would like to formally invite you to support this course in any of the following levels.

All sponsorship levels also include meeting materials, seating in educational sessions, meals, and welcome reception. If computer monitors or any other accessory is needed for your exhibit space, you should contact the hotel audiovisual department directing and arrange for payment separately.

Companies wishing to sponsor any of the above events should contact Lexie Hogge at Lhogge@ioen.net to secure an agreement. All funds should be paid to:

International Orthopedic Education Network (IOEN) 1
Glenlake Parkway Suite 1200
Atlanta, Georgia, 30328

IOEN (w9) will be provided upon request.
